EXPERIENCE

Software Developer Mishanz Private Limited(IC)

12/2023 - Present

Experience

- Developing an ERP based on (HIMS) using React.js to create intuitive and scalable UIs. Capable of working multiple requirements into user-friendly programs.
- Specialized in ERP integration, collaborative approaches, and ensuring security and compliance in agile development environments.

Jr Software Developer - FRONT END TechOn Ventures

04/2023 - 11/2023

Experience

- Developed and maintained a cutting-edge web application using React JS, enabling live channel streaming, movie playback, & seamless videos.
- Implemented payment gateway in Full Stack App using react and restricted premium content to premium users.
- Optimized application performance through code splitting and refactoring in a Full Stack App using react JS
- I exclusively managed the Admin Panel, User Panel & implemented **Redux Toolkit** for state management which enhanced the overall application & improved its performance.

EDUCATION

Bachelors

DHA SUFFA UNIVERSITY Bachelor of Science in Computer Science

01/2019 - 02/2023

Karachi

Course

- BSCS

CERTIFICATES

Learn Interactive JavaScript Website

Learned about programming concepts of object-oriented and worked on conditions, arrays, objects and much more

MODERN JS FOR REACT JS, UDEMY

Learn use of rest and spread operators, id De-structuring, usage of map, filter, reduce and 'callbacks' and 'promises' along with chaining promises

Build a website with HTML and CSS(Skill Path), Code academy

Learned about HTML and CSS , Responsive Design , Flexbox , CSS Transitions , GitHub Pages

Git Basic To Advance, Udemy

Git Branching, pull requests, merging and removing conflicts, Rebase, reset

SKILLS

JavaScript

React JS | REDUX

Node JS

Git

MongoDB

Next JS

Vercel | Netlify

GSAP

Bootstrap | Tailwind CSS | MUI

HTML | CSS

PROJECTS

ERP Management System(HIMS)

- Developed on **multiple reports** including MR Registration, User Summary and many more delivering insights into data trends and user activities.
- Implemented **Redux Toolkit** for efficient state management, improving performance.
- Designed a **dynamic side menu with group-based permissions**, ensuring enhanced security measures and personalized user experiences. Implemented access control to specific pages and granted permissions based on user roles, optimizing usability and safeguarding sensitive data.

Ezra Management System

- Implemented** a multi-step form (stepper) for the login and signup process and **Integrated** Stripe payment gateway, offering three subscription plans: Silver, Gold and Platinum.
- Designed and implemented** calendar functionality for scheduling meetings and **Developed** a shared drive feature for collaborative file management.
- Built** a dynamic dashboard displaying a list of properties and **Created** a "Prepare Property" section for defining property details for purchase.
- <https://ezra-home.kbadosh.com/>

AFO Media App

- Using React JS, I created and managed a dynamic web-based application that allowed for live channel streaming, movie playback, and video access.
- Complex and dynamic APIs implementation in React JS web app.
- <https://afomedia.com/>

ITS USER SIDE

- Implemented **Redux Toolkit** for state management, enhancing the application's performance and maintainability.
- Collaborated with the backend development team to integrate and optimize complex investment, deposit, and withdrawal APIs, ensuring real-time data synchronization.
- Crafted a user-friendly and responsive UI for mobile app using React JS and using best practices for design and usability.
- Implemented data visualization charts to provide users with a comprehensive and better view of their trading.
